DETAILED ACTION

The applicant's After Final Amendment has been entered. The Finality of the Previous Office Action is hereby withdrawn.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. What is rotating the shift plate? No structure is provided to allow for "rotating" the shift plate.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11-13, 17-21, 24, 30-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Kah USP 5417370.

Re claims 11-13, 17-21, 24, and 30-35 Kah discloses a(n):

- Shaft (48A)
- First gear/drive gear (44A)

Art Unit: 3682

- Plate/shift plate (20A, 22A) supported by shaft 48A (See Figure 5) and rotatable between first and second positions
- Second gear/idler gear (42A)
- Third gear/pinion gear (26A) supported by plate 22A and movable between disengaged and engaged position (See Figure 17 and 18)
- Cam/cam feature (24A)
- First cam surface (24A Figure 18)
- Second cam surface (24A Figure 16)
- The first gear is adapted to drive the third gear via the second gear when the plate is in the second position (Column 15, Lines 56-68)
- The plate is rotatable between the first position and the second position (See Figure 17 and 18) about an axis of the drive shaft. It appears that the drive shaft and the plate rotate relative to one another.
- Spring (160)
- Stop (170)
- Arm (146, 142)
- Selectively engaging the pinion gear with the idler gear includes driving the pinion gear with the drive gear via the idler gear (See Figures 17 and 18)
- Regarding the recitation in claim 21 " ...wherein rotating the shift plate includes rotating the shift plate about the axis of the drive shaft." The examiner notes that this recitation appears to be a method step recited in the apparatus claim.
